

# FIBER DROP SYSTEMS

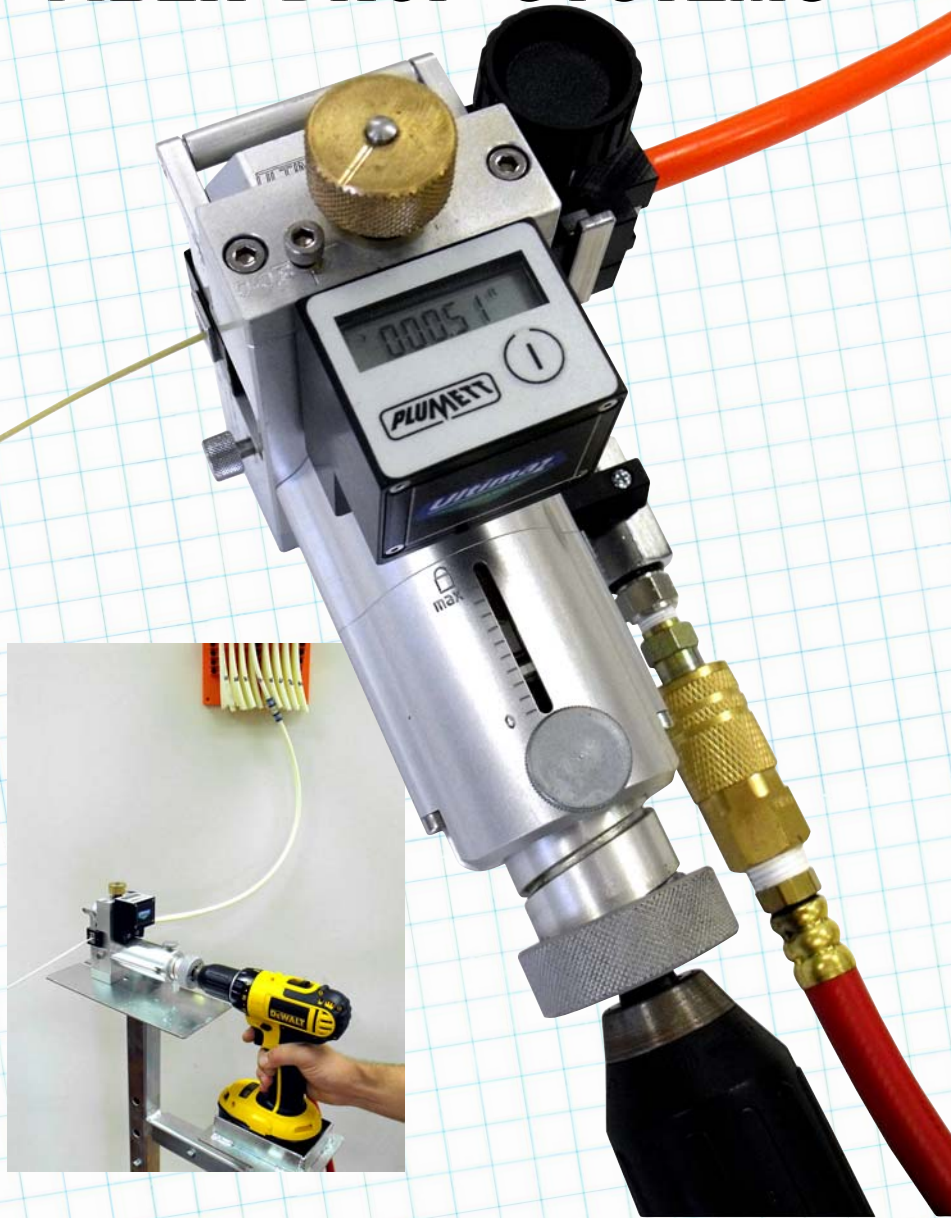

## Ultimaz V20

The **Ultimaz V20 System** is a fiber drop placing unit designed for installing fiber drop microcables with diameters between 0.8mm and 4mm and microduct O.D. from 5mm up to 12.7mm. Other standard features are a bi-directional drive system, digital backlit footage counter/speed indicator, air pressure gauge, standard tools, insert cartridge w/cable guides, operator's manual, training DVD, MicroJet Lube and durable vinyl case. Choose from a wide range of optional duct and cable inserts, seals and drive wheels.

**Ultimaz V20 features** variable torque with adjustable clutch from 0 to 20 N (4.4 lbs) push force covering a wide range of larger and heavier microcables up to 4mm in diameter.

**Power supply** - DeWalt 18 Volt cordless drill or equivalent. (Customer Supplied).

**Air Supply** - Air Compressor or Nitrogen Bottle w/regulator. (Customer Supplied)

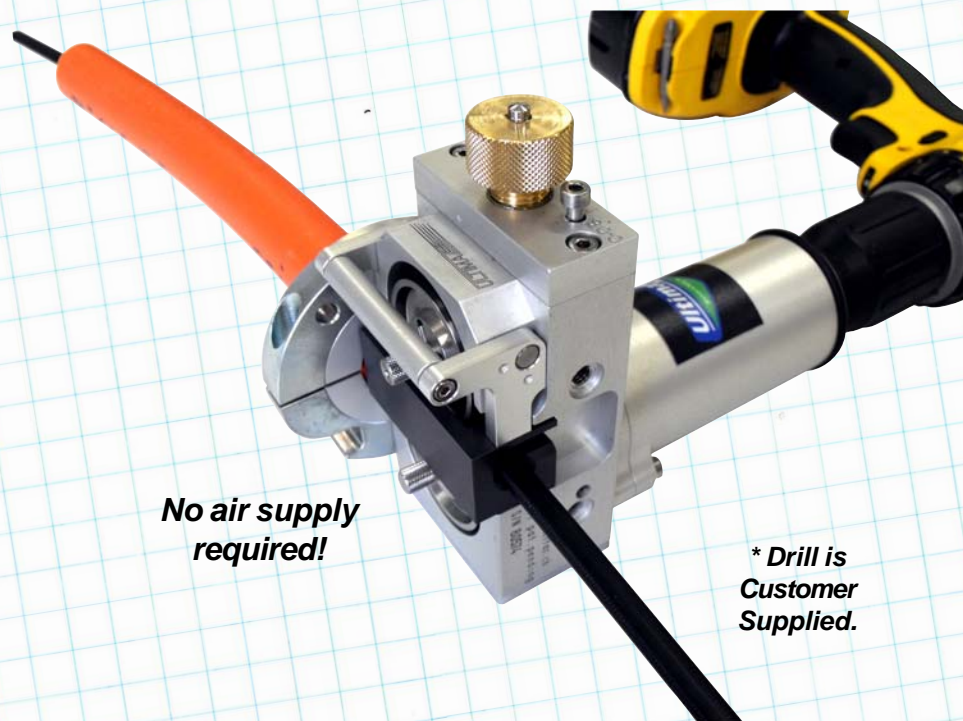

## Ultimaz Pusher

Sherman & Reilly introduces the **Ultimaz Flat Drop Cable Pusher** for installing most standard flat and round fiber drop cables manufactured today. Typical installations are from 50 to 500 feet in inner ducts or conduits. The Ultimaz FDCP can also be used to install and push in a fiberglass rod and pull-back multiple standard copper THHN cables in a reverse application.

### The Ultimaz Pusher Includes:

- Adjustable Drive system with locking clamp
- Drop Cable Cartridge
- Duct Clamp Receptacle
- Four Sets Duct Clamps to fit std: **1/2", 3/4", 1" & 1 1/4" I.D. SDR ducts**
- Standard Tools

**No air supply required!**

**\* Drill is Customer Supplied.**
