Multi-Reel Self-Loading Reel Trailers

Model SLRT-284/56T-20K

Rear lift picks up reel

Front lift in stored position

Front lift prepares for reel change

Rear lift transfers reel

Self-loading, multi-reel trailers are available for 2, 3, or 4 reels of various sizes. The rear lift picks up reel on the ground, raises it to transfer to the next lift, and then to the third or fourth position, all hydraulically. Unloading empty reels is accomplished in the reverse procedure. Rim-driven retrievers are available as options. All power self-contained with 18 hp gasoline engine. Electric trailer brakes and D.O.T. lighting are standard. Hydraulic rear stabilizing jacks are standard equipment.

SPECIAL NOTE: Stabilizing jacks to be down while loading and unloading reels.
