Multi- versal Blocks

Multiversal Blocks

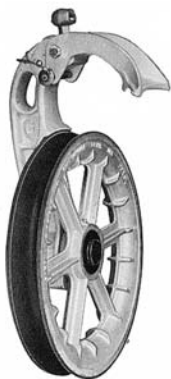

For Conductor Sheave Specifications, see page 5-2 & 5-4

MULTIVERSAL BLOCKS

The S&R 72 Series Multiversal Block is the world's most versatile transmission stringing block. Whether the job calls for stringing a bundle of two, three, three-conductor offset, or four conductors, or if only for single conductor work, the same block can be easily converted.

Helicopter attachments are available for single conductor blocks, and S&R HWA Wheel Attachment can convert bundle blocks.

Multiversals are available in most sheave sizes with Neoprene or Urethane lining.
