DDH-75-D-T Hydraulic Dawk Diesel

General:

The Sherman & Reilly Model DDH-75-D-T is a 7,500 lb. pulling capacity underground “duct dawk” bullwheel puller with all hydraulic driven twin capstan bullwheels. The unit has a constant pulling capacity of 7,500 lbs. and is equipped with footage counter and dynamometer to meter actual conductor pulling lengths and tensions. The Model DDH-75-T is powered by a 28 hp 4 cylinder water cooled Diesel engine with a two-speed forward transmission and a reverse demand payout eliminating cable storage reel overspin. The trailer is constructed of rugged high strength steel tubing welded solid for rigidity and is equipped with an adjustable pintle eye, hydraulic leveling jacks front and rear, tool box, electric road brakes, vinyl cover, and D.O.T. lighting standard. Optional equipment includes PMTA Pad mounted transformer adapter, Air compressor, air adapter for blowing in steel winch line and an electronic load recorder for documenting pulling tensions.
